

Phytomedica I and II

Syllabus

Phytomedica I and II is a series of teaching modules that consist of a review of the different physiological systems of the body, a review of the etiology, pathology and diagnosis of selected diseases within each system, and an overview of the various modalities used in the treatment of these diseases, from a medical, nutritional, Western herbal, Ayurvedic and Traditional Chinese perspective. The course consists of fourteen individual modules representing the equivalent of 112 classroom hours, taught over two semesters.

The **Phytomedica** program is divided into two semesters, consisting of seven modules each, and two final exams. Each module contains a comprehensive quiz to test your knowledge.
